

Emax Premium Gas Driven Series!

Emax Compressor uses only the best components on their Compressors, so when it came to choosing what was going to power our gas driven compressors there was no better choice then Honda GX V Twin Engines! The Honda GX Series have been designed to have higher horsepower, quiet operation and greater fuel efficiency along with easy operation. Honda gives these engines a 3 year warranty!

We have designed our pumps to our last them all to give you the reliability that no matter what job you are doing this pump will last. Our pumps are *ALL* solid cast iron,, from the cylinder, cylinder heads, crankcase, flywheel , crank and forged steel connecting rods - not aluminum! 99% of the pumps you see on the market today have aluminum rods. Our pumps have twin belts, this ensures better belt grip and longer belt life. These pumps have head unloaders which are great for continuous run and gas drives that have high duty cycles. We run our pumps at low RPM's producing a quite, cooler longer lasting pump!

Emax Compressor has the best warranty in the industry! This is a bumper to bumper warranty, not a Pro-rated warranty. Your Honda engine will have a 3 year manufactures warranty. We carry a full line of new replacement parts. All we ask is that you use our oil to ensure the correct oil with the specs needed is being used.
